

# FORWARD

The International Council for Machinery Lubrication (ICML) is a vendor-neutral, non-profit organization. ICML serves the global industry as the world-class authority on machinery lubrication that advances the optimization of asset reliability, utilization and costs. In support of this mission, ICML created ICML 55.1 as a standard that states the requirements for the voluntary certification of lubricated mechanical asset management. The ICML 55.2, Guideline for the Optimized Lubrication of Mechanical Physical Assets, is a practical guide to help asset owners meet the requirements outlined in ICML 55.1. The companion document ICML 55.2 expands on the requirements of this document to help organizations augment and implement the requirements stated herein. ICML offers this standard in support of, and in compliance with, ISO 55001. The specific focus of ICML 55.1 is to state the requirements for effective lubrication management that in turn is intended to support the organization's physical asset management plans.

## DISCLOSURES

- a. This ICML 55.1 document represents, to the most thorough degree possible, the consensus of the machine lubrication community pertaining to the scope and best practices associated with lubrication management.
- b. While this standard is intended to align with ISO 55001, as amended, and its subparts, this standard was developed and created independent of ISO 55001 and is neither explicitly nor implicitly endorsed by the International Organization for Standardization (ISO).
- c. ICML does not, with any measure of uncertainty, attest to or confirm conformity of this document as it pertains to ISO standards.
- d. The interpretation and implementation of this ICML standard is dependent on the proper interpretation and implementation of the normative references identified in this standard, especially in relation to ISO 55001. Information within this standard is augmented by the listed informative references.
- e. ICML 55.1 is a voluntary standard. No liability shall be attached to the ICML, its directors, members, employees, contractors or agents, including individual experts and members of its technical committees, for any personal injury, property damage, or other damage of any nature that may arise from the interpretation or implementation of any or all parts of this standard.
